a) CDF of p-value under the null

Pr[P ≤ p]

p

b) Number of agents (N)

rejection rate at α = 0.05

N

c) Content per agent (m)

m

d) Subnetwork size (|S|)

rejection rate at α = 0.05

|S|

e) Timesteps (T)

T

f) Number of subnetworks (K)

share of subnetworks recovered

K

pairwise agent correlation

ρ = 0 (Type I error)

ρ = 0.2

ρ = 0.3

ρ = 0.5

estimation regime

scan (S unknown)

oracle (S known)
